

# Offshore Compressed Gas Safety Training

*If you can't identify the hazards you can't assess the risk*

*In response to customer demand we are now able to provide both safety awareness and practical workshops offshore*

## Industrial Gases Safety Awareness Workshop (half-day)

### Benefits

- Training delivered by highly skilled, industry trained, experienced course directors
- Staff are efficiently trained in all aspects of gas safety
- Cost-effective on-rig training
- Staff are made aware of the hazards so that they can identify risks and adopt safe working practices

### Who should attend?

- Anyone using, handling or storing industrial gases on site
- Managers, supervisors and staff from all functions who are responsible for the safe use of gases
- Anyone responsible for health and safety

*"Delegate feedback suggested it was a very constructive and informative course. The hazard awareness and information on storage was particularly relevant and useful"*

Cathryn Fleming  
Training Coordinator  
ConocoPhillips UK Limited  
Aberdeen

### Workshop overview

- Why do accidents occur?
- What's in the air?
- Inert gases and oxygen deficiency
- Oxygen enrichment
- Hazards posed by oils and greases
- Hazards of flammability
- The need for personal protective equipment
- Safe operation of gas cylinders
- Gas control equipment - regulators
- Safe handling of gas cylinders
- Safe storage of gas cylinders
- What happens when it all goes wrong

### What you will learn

The workshop will enable participants to:

- Correctly identify gas cylinders
- Recognise how cylinders operate
- Be aware of the hazards of asphyxia
- Recognise the hazards posed by oxygen enrichment
- Identify flammability hazards
- Select the correct gas control equipment
- Recognise the hazards of using incorrect manual handling techniques
- Re-assess current storage facilities in line with safe working practices
- Introduce safe working practices into their workplace

### Workshop price

# Gas Safety in industrial applications

*If you can't identify the hazards you can't assess the risk*

## Next step...do your delegates require practical training?

- Oxy-fuel gas systems set-up and pre-use check
- Oxy-fuel gas systems maintenance inspection

All delegates must attend the safety awareness workshop before they can participate in the practical.

Also available are practical workshops that combine safety, process & practice:

- Practical oxy-fuel gas cutting training
- Practical brazing & soldering training
- Practical MIG (GMAW) welding training
- Practical TIG (GTAW) welding training

## Providing total training solutions for gas users...

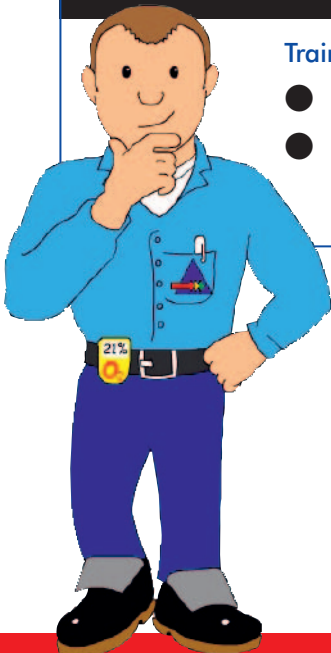

- All your delegates will receive a certificate of attendance and comprehensive workshop literature for continued reference purposes in the workplace. This includes relevant Standard Operating Procedures if a practical workshop has been attended.

## e-Learning

- Packages are available for those clients who need a more flexible, accessible method of training which delivers high quality affordable training without the need to gather employees together in a classroom. This method of training is ideal for single users, new starters or as refresher training. For full workshop information and the opportunity to view the demo please visit us at

## Special Requirements...

Trained by us before? Please ask about Instructor-led or web-based **Refresher Training**.

- **Tailored Workshops** can be provided to meet your individual training requirements.
- **On-site Advisory Survey** - we can send a Safety Consultant to produce a report which provides a detailed analysis and guidance on appropriate solutions to minimise exposure to gas related hazards.

### Contact us...
